The educational program is designed and implemented for those who want to improve their communicative competencies in oral and written speech communication, master modern technologies and methods of teaching foreign languages, master computer technologies used in the practice of teaching a foreign language, study the features of pedagogical activity, and implement the acquired knowledge and skills in practice. The program includes disciplines of both theoretical and applied nature, which will allow the master to carry out professional pedagogical activities at a high level.

The program involves combining quality training with work. Undergraduates are provided with: continuous practice in educational institutions of various types; a minimum number of lectures and an emphasis on project practical work; an individual approach that allows you to build a unique educational route.

Key disciplines of the program:

Intercultural communication; Theory; Methodology and practice of teaching a foreign language; Theory and practice of modern pedagogical education; Current trends in modern linguistics.

Partners involved in the implementation of the program:

Higher, secondary vocational, secondary educational institutions, Language educational centers, Organizations of additional education, the Department for Work with Municipal Educational Institutions, the Ministry of Education and Science of Primorsky Krai.
